1 INTRODUCTION

1.1 PURPOSE

The New York State Education Department (SED)has the responsibility for developing and implementingan effective data privacyand information securityprogram. This policy document is a critical component of the programas it outlines the minimum requirements necessary to the confidentiality, integrity, and availability of SED information Technology (IT) assets and data. This includes all SED information systems and communication networks, whether owned, leased or rented by SED and the information stored, processed and transmitted on or by these systems and networks. This policy shall be published on SED's website.

1.2 OBJECTIVE

The objective of this policy is to address SED's esponsibility to adopt appropriate administrative, technical and physicals af eguard and controls to protect and maintain the confidentiality, integrity and availability of its IT assets Od/T1_68e0ilamf260 1 Tf2I.5 in

The Information Security Committee, led by the CISO with leadership representation from across SED must meet regularly to discuss the information security program, requirements, and risks concerns a soutlined in the Information Security Committee Charter.

The Deputy Commissioner are responsible for implementing privacy and security policies and practices into the operations of their program offices and the Department, including strategic planning, budget planning, and organization architecture.

3 GOVERNANCE

SEDshall develop, implement and maintain an organization wide privacy and security program to address the confidentiality, integrity and accessibility of SEDT systems and data that support the operations and assets of SED, including those provided or managed by another organization, contractor, or other source.

3.1 ACCEPTABLESE POLICY USERACCOUNTPASSWORD OLICYAND OTHER RELATEDEPARTMENTOLICIES

Usersmust complywith NYSED's formation Security Policy, which outlines the responsibilities of all users of SED information systems to maintain the security of the systems and to safeguard the confidentiality of SED information.

Usersmust complywith the AcceptableUseof ITResource Policyin using Department resources.

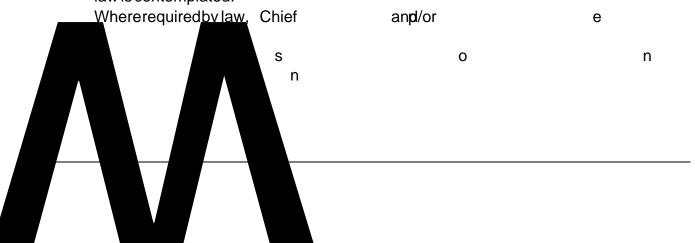

Usersmust complywith the UserAccountPasswordPolicy.

All remote connections must be made through managed points rollientry in accordance with the Data Privacy and Security Guidelines for Remote Work and Telecommuting Policy.

3.2 DATAPRIVACY

The confidentiality of SED data must be protected and must only be used in accordance with state and federal laws, rules and regulations, and SED policies to prevent unauthorized use and/or disclosure.

SED's Chief Privacy Officer leads the Data Privacy Governance Board. The Data Privacy Governance Board reviews approves and/or provides guidance to SED program offices when the collection, disclosure or new processing of personal information protected by law is contemplated.

3.3	PRIVACXNDSECURITMSKM0003>]TJ 8.5olicy

These duties and/or administrative functions must be captured in the risk assessment for each respective information system that collects, maintains, uses, and/or sharespersonal information.

Where technically feasible, users must be provided with the minimum privileges necessary to perform their job duties.

6 AWARENES NDTRAINING

All SEDpersonnel, volunteers, interns, and contractors with access to SED information systems and/or information must complete data privacy and security awareness raining on an annual training ective

8.4 PHYSICAENVIRONMENT

Controlsmust be implemented to ensure the physical and environmental protection of data and systems.

Such controls must be commensurate with the level of data being stored, transmitted or processed in the physical ocation but can include emergency power shutoff, standby power, fire detection/suppression systems, environmental controls and monitoring, and physical access control and monitoring.

8.5 DATASANITIZATION

All sanitization and disposaltechniques must be performed in accordance with SED's ecure Disposa Standard.

All mediasanitizations must be tracked, documented, and verified.

Sanitization procedure must be tested.

Both electronic and hard copy media must be sanitized prior to disposal, transfer, release out of organizational control, donation, or release for reuse, using sanitization techniques and procedure as outlined in the LaCo Table Control of the Con

9 MAINTENANCE

Repairsand maintenance on all hardware and software must be controlled and performed only by approved personnel. Questions about approval will be addressed by the Chief Information Officer. Security commensurate with the sensitivity level of the system data must be implemented to protect data and information systems from unauthorized accessor modification.

All maintenanceactivities must be approved and monitored by designated system/facility staff.

To the extent possible all maintenanc activities must be scheduled n advance and approval granted by the impacted parties.

All software patches and updates must only be deployed after research and testing has been conducted in a development or test environment, where such test or development environments exist. Unless no test or development environment exists, software patch and/or update testing on operational systems is prohibited.

All systems must be reviewed on a regular basis to ensure that current patches are applied. Maintenance tools must be inspected, approved, controlled, and monitored. All mediamust be checked or malicious code before being introduced to the production environment.

A process for maintenance personnel authorization must be established and a list of authorized maintenance organization/personnel must be maintained.

Sessionand network connections for remote maintenancemust be terminated when non A 6 A pocket

 $\mbox{A discrete, identifte,i} \\ \mbox{Information SystemComponent}$

Network

Information system(s)implemented with a collection of interconnected components. Such components may include routers, hubs, cabling, telecommunicationscontrollers, key distribution centers, and technical control devices.

Network Access

Accesso an information systemby a user (or a processacting on behalf of a user) communicatingthrough a network (e.g., local area network, wide areanetwork, Internet).

NonlocalMaintenance

Maintenance activities onducted by individual scommunicating through a network, either an external network (e.g., the Internet) or an internal network.

Non rrepudiation

Protection against an individual falsely denying having performed a particular action. Providesthe capability to determine whether a given individual took a particular action such as creating information, sendinga messageapprovinginformation, and receiving a message.

Organization

An entity of any size, complexity, or positioning within an organizational structure(e.g., a state departmentor, asappropriate, any of its operational elements).

OrganizationalUser

An SEDemployeeor an individual SED deems to have equivalent status of an employee including, for example, contractor, guest researcher, individual detailed from another organization. Policy and procedures for granting equivalent status of employees to individual smay include need r to rknowrelationshipto SEDandcitizenship.

PersonallyIdentifiable Information (PII) or PersonalInformation (PI)

Information which can be used to distinguishor trace the identity of an individual (e.g., name, social security number, biometric records, etc.) lor identifying information alone, or when combined with other erso date er'sn ide

а Potential Impact

lame.e

Actions taken to render data written on media unrecoverableby both ordinaryand, for some forms of sanitization, extraordinary means. Sanitization Processo remove information from media such that data recovery is not possible.It includes removing all classified labels, markings, and activity logs. A condition that results from the establishment and maintenance of protective measuresthat enable an enterprise to perform its mission or Security critical functions despite risks posed by threats to its use of information systems. Protective measures may involve a combination of deterrence, avoidance, prevention, detection, recovery, and correction that should form part of the enterprise's risk managementapproach. A safeguardor countermeasureprescribed for an information systemor an SecurityControl organization designed to protect the confidentiality, the
