Stakeholders provided input through multiple avenues as detailed in our district's plan. This input helped to drive our planning and the distribution of funds to areas of need. With the unknown levels of learning loss, it was apparent to all involved that funds are directed toward research-based interventions and extended learning opportunities. In addition, the district extended its focus directly to low-income families, families of English Learners, students of color, and students with disabilities. Further, the district intends to provide a safe and healthy learning environment through air quality improvements.
