THE STATE EDUCATION DEPARTMENT
Office of State Assessment
Albany, New York 12234

**INFORMATION BOOKLET FOR SCORING
THE REGENTS EXAMINATION IN GEOMETRY
JANUARY, JUNE, AND AUGUST 2023 ADMINISTRATIONS**

GENERAL INFORMATION

The general procedures to be followed in administering Regents Examinations are provided in the publications [Directions for Administering Regents Examinations](#) (DET 541) and the [School Administrator's Manual](#), both available on the Department's website. Questions about **general administration procedures** for Regents Examinations should be directed to the Office of State Assessment (OSA) at 518-474-5902 or 518-474-8220. For information about the **rating** of the Regents Examination in Geometry, contact OSA at 518-474-5902.

School administrators should print or photocopy this information booklet and distribute copies to all school personnel who will be scoring the examination.

SCORING THE EXAMINATION

Scoring Key and Rating Guide

Printed copies of scoring keys and rating guides will **not** be sent to schools for any of the Regents Examinations. Instead,

The scoring key and rating guide for each examination includes the answers to the Part I multiple-choice questions and rubrics for scoring each of the constructed-response questions. Teachers must become thoroughly familiar with all the scoring materials for the constructed-response questions they are scoring before beginning to score student responses to examination questions.

The Department will provide a *Model Response Set* for the Regents Examination in Geometry. Schools are encouraged to incorporate the *Model Response Set* into the scorer training or to use it as additional information during scoring. While not reflective of all scenarios, the model responses selected for the *Model Response Set* illustrate how less common student responses to constructed-response questions may be scored. The *Model Response Set* will be available on the -

Appendix I

Determining the Student's Final Examination Score for the Regents Examination in Geometry

The format of the conversion chart is illustrated below. The charts provided on the Department's website for each administration of this examination will include scale scores ranging from 0 to 100 within the cells of each chart. It is *crucial* that, for each administration, *only* the conversion chart provided for that specific administration be used to determine the student's final examination score.

If the determination of each student's final examination score (scale score) is being done by hand, find the student's total test raw score in the column labeled "Raw Score" and then locate the scale score that corresponds to that raw score. The scale score is the student's final examination score. Enter this score in the space labeled "Scale Score" on the student's answer sheet.

Schools are not permitted to rescore any of the constructed-response questions on this examination after each question has been rated once, regardless of the final examination score. Schools are required to ensure that the raw scores have been added correctly and that the resulting scale score has been determined accurately.
